

Sediment & stormwater

Field day 2010

Innovation driving change

Date: Wednesday, 8 September 2010
Time: 12:30 – 5:00
Venue: Events site, Auckland Botanic Gardens,
Manurewa (Everglade Drive entrance)

If you're in the field of civil construction (large and small site), stormwater, utilities, contractor, consultant or council staff, the ARC invites you to its Sediment and Stormwater Field Day, 2010.

With the theme of 'Innovation driving change' this field day will give you on a hands-on look at some of the newest developments in our industry.

There will be **big project showcase talks** from some of the region's main contractors followed by large scale, small group, practical demonstrations of **TP90 works**, **small sites and utilities** and **low impact design**.

And that's not all! Industry and government agencies will have their trade show on site, and you can have a sneak preview of the Botanic Gardens own low impact design theme park that is almost ready for its official opening. They have installed green roofs, permeable paving, vegetative swales, rain gardens, rain tanks and a new urban green tree pit.

Attendance is free, and there is plenty of parking (see map below). We'll finish the day with a traditional BBQ and a chance to talk shop before the earthworks season gets underway.

Please RSVP to stormwater@arc.govt.nz by 03 September 2010

We look forward to seeing you there!
